• **Concept :**

The TOYO ET range of submersible pumps with agitator has been specially designed to handle heavy and abrasive slurries.

These centrifugal pumps with semi-open impeller feature a unique agitator design. This agitator lifts sediments into suspension, creating a slurry mixture. This enables continuous pumping of media with a high concentration of solids.

Robust construction, careful selection of materials and unique contour components have produced a pump with excellent abrasion resistance. These characteristics ensure long service life and economical operation. The impeller, the wear plates and the agitator are manufactured in cast chrome iron (24 to 28 % Cr).

A strong short shaft, supported by a series of carefully selected bearings, and a double mechanical seal, operating in an oil bath, ensure tightness in the hardest of conditions.

The axial flow of the pumped liquid secures the cooling of the class F motor and makes partial immersing possible. This design reduces the outer dimensions of pump and hoses assembly.

Servicing the pumps and maintaining good working order is easy. One adjustable wear plate allows simple adjustments to maintain long lasting high performance.

The standard ET pumps are equipped with a thermal protection. They are available in special versions for high temperatures.

• **Operating conditions :**

ET pumps can handle slurries with solid content of up to 50 % by weight, particle sizes up to 30 mm and liquid temperatures up to 60°C with pH levels between 4 and 9,5. Special versions are available for liquid temperatures up to 80°C. The maximum operating depth is 30 m.

• **Electric power requirements * :**

Pump type	Power kVA	Amp. 400 V
ET 1	3	2.2
ET 2	5	3.5
ET 3	6	5.0
ET 5	12	8.3
ET 7.5/B	15	11.8
ET 10/H	20	16.3
ET 15/B	30	23.0
ET 20/B	40	31.0

* These figures are given as an indication

• **Electric cable :**

The standard cable type to be used for connecting the pump is HO7RN-F and its specifications should correspond to the following :

Pump type	Section	Outer diam. mm	Max. length m / 400V
ET 1	4 x 6 mm ²	19	700
ET 2	4 x 6 mm ²	19	600
ET 3	4 x 6 mm ²	19	500
ET 5	4 x 6 mm ²	19	350
ET 7.5/B	4 x 10 mm ²	23	350
ET 10/H	4 x 10 mm ²	23	250
ET 15/B	4 x 10 mm ²	23	180
ET 20/B	4 x 10 mm ²	23	120

• **Starter :**

A reactor starter has to be used from ET15/B on.
